THE WHOLE WORLD OF POSSIBILITIES

Nestler-matho®

You have an idea for your unusual advertising project? Or none at all? Get in touch with us! Our creative specialists will turn a vague idea into a tangible product.

In our global network, we find the right partner for the implementation, always keeping your quality, price and time requirements in mind.

Every product we develop with you complies with the latest standards. Tested and safe. Sustainably long-lasting, climate-neutral and made by people for people. This is guaranteed by our cooperation with AMFORI- BSCI-certified companies.

You don't buy a pig in a poke: before production, you hold a functional sample or prototype in your hand for approval.

Sit back and relax! We import your product and take care of delivery, storage or individual shipping.

Here's the first step for „Wow!“ experiences:
Contact us! Personal, relaxed and fast via direktimport@nestler-matho.de

Orchard meadows protect

Since the 18th century, fruit cultivation outside the gardens and villages has been promoted; at that time, of course, not for reasons of landscape conservation. Fruit growing was simply important for self-sufficiency. And the meadows provided fodder for the cattle. Over the centuries, more than 6000 fruit varieties have been developed throughout Europe. Today, extensive orchards with high trunks is a counter-model to the monoculture of plantation farming. The absence of pesticides and synthetic fertilisers also preserves the richness of flora and fauna: meadow orchards can be home to 2000 to 5000 animal species. Have we aroused your interest and would you like to become active in the preservation of the cultural landscape yourself? Search the internet for local projects, your help is welcome!

From the sales price we donate € 0,50

to the orchard project OBSTGUT LEISBERG, where many volunteers take care of the traditional cultural landscape and biodiversity.

Our 12-point climate protection plan

Resource conservation

- ✓ As little plastic as possible
- ✓ Prudent use of recycled plastics
- ✓ Pure materials, no composites
- ✓ Plastic-free packaging
- ✓ Use of bioplastics such as PLA

Longevity

- ✓ 0% disposable items in the portfolio

Sensible recycling

- ✓ Natural materials are of course also biodegradable
- ✓ Pure materials can be put back in circulation

Climate neutrality

- ✓ Traceability of the climate projects is provided on every product (QR code)
- ✓ Payment of countervailing charges to NATURE OFFICE

Logistics

- ✓ Optimised packaging sizes for lower CO2 emissions
- ✓ Carbon-neutral shipping available on request
- ✓ Plastic-free secondary packaging

Alongside these factors, the methods and materials we use when producing our products are extremely important to us and also set us apart. Fair wages, social standards, rejection of child labour and precarious employment, as well as securing safety at the workplace are all rights that we demand for everyone. This is in our own interest as a manufacturer and also that of our customers, who are looking for peace of mind when purchasing items.

Member of amfori BSCI: Securing social standards through strict audits

TÜV ISO 9001 certified: Continuous improvement of operational procedures, especially with regard to climate protection

Certified safety: Technically flawless products for hassle-free use and peace of mind

Laser engraving with CO₂ laser machines from Trotec. We use the fastest laser engraving machines on the market to significantly reduce delivery times, significantly.

3D engraving

Our Blue Line fibre lasers facilitate 3D engraving of large-area motifs on round bodies. We can therefore engrave workpieces with complex shapes on various levels, as well as bevels and curved contours for you without any significant distortions.

Digital rotary printing

The latest generation of digital LED UV rotary printing facilitates large-format printing on bottles and glasses, as well as full-circumference rotary printing.

Embossing

Deep and relief embossing produces fantastic results on leather, soft plastics and cardboard covers. Embossing can be performed blind or with a background colour. The option to emboss individual names using font suitcases is a special feature. This makes products unique and individual.

Digital printing

Digital technology is increasingly being used for printing small volumes and for motifs with colour gradients. The higher per unit printing costs are largely compensated by the lower preprinting costs here.

Pad printing

Pad printing is so precise that even the smallest fonts and contours can be produced with an excellent finish. We implement up to 6-colour solid colour motifs for you. A large number of basic colours is available, so we can mix any colour value based on RAL, HKS or Pantone specifications.

Do you have any questions about other finishing options? We are here to answer all your questions, advise you without obligation and help you make the right decision! Call us at **+49(0)7221-2154-0**.
